Dynamic Full Stack Web Developer with expertise in front-end and back-end technologies, dedicated to creating seamless, responsive, and user-friendly web applications for optimal user experiences.

SKILLS

Frontend : Html, CSS, Tailwind CSS,Javascript,ReactJs,NextJs,Redux,Typescript,Firebase
Backend : Node JS, Express JS, MongoDB, jwt
Tools : Git, Github, VS Code, Vercel,figma

PROJECTS

Expo(LMS-Platform)   Live Site | Code Link

Feature :
- Users can track their learning progress through detailed course dashboards, which include progress bars, providing a structured and motivating learning experience.
- Users can securely purchase courses via Stripe, ensuring a seamless and secure transaction experience. Purchased courses are immediately available in their personal dashboard for easy access.
- Admins can manage all aspects of the platform, including user roles, course creation, and platform analytics. This provides efficient control over user engagement, course performance, and platform growth.

Technology : Next js,Redux, Mongoose, Express js,Typescript,Stripe

MetroRide(Car-Rant)   Live Site | Code Link

Feature :
- Users can easily browse a wide selection of cars, filter by model, price, and availability, and book a car with a few clicks. The booking form includes car selection, personal details, and payment options, offering a streamlined and secure experience.
- Like Airbnb, users use a search bar to specify location, guest count, and room preferences, ensuring tailored results for their accommodation needs.
- We offer three roles: user, manager, and admin. Managers create rooms, while admins manage the site. Simplifying control and management privileges.

Technology : React js,Redux,Mongoose, Express js,Stripe

Book(RMS-system)   Live Site | Code Link

Feature :
- Similar to Airbnb, users can book rooms for specific dates, ensuring exclusivity as once booked, the room becomes unavailable for those dates to other users.
- Admins have access to a robust dashboard where they can manage car listings, monitor bookings, and ensure smooth operation and efficient management.
- The platform offers a fully responsive design, ensuring a seamless experience on mobile, tablet, and desktop devices. Additionally, users can switch between dark, light, and system themes, providing a personalised interface.

Technology : React js, MongoDB, Express js,Stripe,Material ui

EDUCATION

Port City International University
B.S.C in CSE
(2024-running)
